AVA Platform Dashboard 2026: the numbers behind our tools

A snapshot of AVA's digital platform as of October 14, 2026 — counted from our own databases, with what each number means and what it doesn't.

OCTOBER 14, 2026 · 2 MINUTE READ · BY RICARDO A. CALDERÓN LÓPEZ

The picture: The numbers in this article as bars, three per section. Each line up the scale is ten times more.

Field evidence

3,761
distinct site photos indexed, from 16 projects

3,760
searchable by what they show (vision model, run on our server)

1,209
with readable text found by OCR

Photos come from SharePoint project folders (3,131), the Visit Checklist phone app (266) and approved reports (383). Indexing started in September 2026.

Tanks and HUD separation distances

153
tanks recorded across 7 projects

139
run through HUD's official ASD calculator, PDF filed

52
explosives deliverables for 5 projects

Contamination screening

87
EPA facility screening runs since March 2026

10
projects screened by name, plus multi-site batches

981
leaking-tank (LUST) sites in our reference lists

Maps and GIS

33
projects in the shared site registry

251
project maps for 17 projects

279
proximity screenings stored for 20 projects

460
Puerto Rico government layers catalogued

137
layers mirrored locally (~4.7 M features)

31
map and exhibit generators

Documents and review

~350
reviewer comments extracted from 17 review PDFs

149
AI-drafted narratives, 46 rated — average 4.1 of 5

17
documents converted to the AVA editorial template

Coordination

1,322 studies, consultations and deliverables tracked for 23 projects	**60** project e-mails filed automatically in September, 42 AI-summarized	**102** daily digest e-mails sent to the team

Market intelligence

15,030 Puerto Rico public contracts in our registry	**50,493** contract pages searchable by full text	**3,909** companies catalogued

How to read these numbers

- **They count work done, not time saved.** We have not measured hours saved, and we don’t claim any.
- **Adoption is concentrated.** Several field tools are used by a few people today; the numbers grow as the team adopts them.
- **They are a snapshot.** All counts were taken on October 14, 2026 from the platform’s own databases and logs.
